

## 2. Installation

To install the program, run a link to *OptiFeed* installer, available on the website [www.lpdsoft.com](http://www.lpdsoft.com), in a web browser (preferably Microsoft Internet Explorer 5.01 or later).

If Microsoft Solver Foundation system component is not installed on your computer, download it and install it using the first button available in *OptiFeed* installer.

Then click the second button with inscription ending with a phrase "proceed with OptiFeed installation".

The installation program will check whether you have installed other components of the system needed to operate the program and, if necessary, will download them from the Internet and install.

After successful installation, *OptiFeed* will automatically start. Later it will be run from the start menu | All Programs | LPDsoft | *OptiFeed* and using *OptiFeed* icon on the desktop.

In case of problems with the installation, please contact us at the address [support@lpdsoft.com](mailto:support@lpdsoft.com).

Note: During installation, Microsoft Internet Explorer browser should be the default system browser.
