#264	Fish products and by-products
#268	Meals and industrial feed
#272	Ensilage
#276	Other plant feeds

At the bottom of the window, there are two buttons: a green checkmark icon followed by the text "OK" and a red X icon followed by the text "Cancel".

Groups codes and names are edited directly in the table.

It should be kept in mind that:

- codes and names must be globally unique (i.e. within all the groups)

- groups supplied with the program (written in gray text and with codes beginning with the # character) are non-editable and indelible

The button with a minus sign on it is used to delete redundant groups. It is available in both the quickslot bar and in the table context menu. Groups to which ingredients are assigned are indelible.
